WHO AM I?

TL; DR: I am a geek of learning, love management, problems solving, and ... playing piano

As an experienced **Project Manager** with a strong background in Scrum, I excel in facilitating agile processes and guiding teams to deliver high-value outcomes. I lead Scrum ceremonies, remove obstacles, and coach teams on Scrum principles while ensuring smooth communication and shielding the team from external disruptions. Additionally, I maintain accurate reporting, including timesheets and weekly progress reports, to keep stakeholders informed and projects on track.

Being experienced in a wide range of areas in IT, from a **Full-stack Web Developer** since 2015, later become **Project Manager** since 2020, I'm familiar with Software LifeCycle and the way to engage between "tech" and "non-tech" stakeholders.

My respected values?

"Faith - Love - Gratitude"

Would you like to follow me on [Github](#), also my [blog](#)?

SKILLS & ATTRIBUTES

Specialities	<ul style="list-style-type: none">• Experience to manage and lead the project team to succeed with the team size about 30 team members, multiple vendors, and stakeholders; familiar with both Traditional and Agile methodologies following the PMI standard (certified PMI-ACP)• Experience with Frontend Web development technologies, such as Vue 2/3, ReactJS, NextJS Framework, HTML5/CSS3, SASS/LESS, Gulp, Webpack, NPM, jQuery• Experience with Backend Web technologies such as Laravel, Nodejs, RESTful API design, MySQL, Networking/Cloud (basic AWS, Infrastructure)

Information*

WORKING EXPERIENCE HIGHLIGHTS

SBC in FPT Software

Project: BBX (Nov 2022 – present)

Facilitate assessment phase and manage development team during implementing phase to build the micro-services channel, focus mainly on Retail, also MSME & Corp.

Role: Project Manager / Scrum Master

- Facilitate the Scrum process including conducting scrum ceremonies such as Sprint Planning, Daily Standup, Sprint review, and Sprint Retrospective
- Remove impediments that may be preventing the team from delivering value
- Facilitate communication to bring clarity and keep stakeholders on the same page
- Reporting project status (Timesheet report, weekly report)

Technology: Java, SpringBoot, Confluent Kafka, MongoDB Atlas, Redis Cache, ROSA, Kubernetes, Junit (Unit testing)

COX Automotive in FPT Software

Project: DSSD (Oct 2020 – Jul 2023)

Cox Automotive provides complete set of Data solutions to bring values to businesses. However, they are having a couple independent platforms, which are different in both Technologies and Architecture. As the data getting bigger and business growth, it is extremely challenging to develop new features, maintain and fix bugs.

Hence, it is an urgent requirement to construct a multi-tenant data, analytics and reporting solution in AWS using Snowflake and MicroStrategy products that leverages and extends the Cox Automotive Data Platform patterns and capabilities.

Role: Scrum Master

- Facilitate the Scrum process including conducting scrum ceremonies such as Sprint Planning, Daily Standup, Sprint review, and Sprint Retrospective
- Remove impediments that may be preventing the team from delivering value
- Coach the team on Scrum principles and practices
- Protect the team from outside distractions and interruptions
- Facilitate communication
- Reporting (Timesheet report, weekly report)

Technology: Snowflake, Microstrategy

Multiple clients in Legato Technologies Ltd

Project: Out-sourcing projects from Hongkong clients (Aug 2020 – Jul 2021)

Oversee the development team by managing technical issues, ensuring smooth project progress, and providing ongoing support. Coordinate resource allocation according to project needs, and collaborate with the QC team to maintain quality control and meet deliverable standards.

Role: Project Lead

- Develop, maintain and support technical issues
- Manage the development team
- Resource arrangement according to projects
- Working with QC for quality control and deliverables
- Reporting projects status

Technology: ReactJS, Laravel (OctoberCMS), PHP, MySQL, MariaDB, Objective-C, Kotlin

Pizza Hut in Pizza Hut Digital Venture

Project: Fast Casual Digital Store (Sep 2019 – Aug 2020)

Collaborate on building the frontend for the project, focusing on maintaining and optimizing the existing UI/UX for markets in Japan, Singapore, the Philippines, and Malaysia. Additionally, work on cloning and optimizing the codebase to support expansion into new markets.

Role: Frontend Engineer

- Collaborate to build Frontend side of the project
- Maintain & optimize existing UI/UX of markets Japan, Singapore, Philippines, Malaysia
- Cloning and optimize codebase for new markets

Technology: VueJS, ReactJS, Nodejs, SCSS/SASS, TailwindCSS, Webpack, Micro-services methodology

Multiple clients in Evolvable Asia Solution

Project: Out-sourcing projects from Japan clients (May 2018 – Sep 2019)

Collaborating mainly on frontend development, requesting layout designs, drafting documentation, and refining API design. Responsibilities also include mentoring new team

members, developing responsive WordPress themes and plugins, building a project management web application, and contributing to API design to meet project goals.

Role: Web developer

- Discuss, analyze requirements & request API design
- Request layout design, writing documents, discuss API design
- Building a responsive web application
- Building responsive Wordpress's theme
- Building Wordpress's plugins
- Mentor for new members in Frontend stuff

Technology: ReactJS, Nodejs, SCSS/SASS, Laravel 5, WordPress, HTML5/CSS3, MySQL

Motobike Search in RIVERCRANE VIETNAM Co. Ltd.

Project: Motobike Search (Oct 2016 – May 2018)

Worked on the renewal of the old Java source code to Laravel (PHP) and ensure ongoing project maintenance.

Role: Software Engineer

- Analyze the requirement of existing legacy system
- Support on renewing the old source code (Java) to Laravel (PHP)
- Maintain the product afterward

Technology: Laravel 5, HTML5/CSS3, jQuery, Solaris Search Engine, SCSS/SASS

Tinhte in HOASEN Solution Co. Ltd.

Project: Tinhte.vn (Oct 2015 – Oct 2016)

Maintain and implement new features for the tech market forum.

Role: Software Engineer

- Develop new add-on based on Xenforo platform
- Maintain, implement new features for the tech market forum

Technology: Xenforo CMS, PHP, MySQL, jQuery, HTML5/CSS3
